EDUCATION

Pune Institute of Computer Technology

Bachelor of Engineering in Computer Engineering, **CGPA - 8.44**

Pune, India

December 2021 – June 2025

EXPERIENCE

Guidepoint

June 2025 – August 2025

Backend Development Intern

Pune, Maharashtra

- Built backend services in a serverless architecture using **Node.js**, **DynamoDB**, and **AWS Lambda**.
- Developed a reusable **TypeScript** utility package for structured logging, improving **log consistency** and **debugging workflow** across internal Node.js services.
- Created automation scripts in **Node.js** and **Python** for product-related backend operations, integrating with **DynamoDB** and **Auth0** APIs to improve internal efficiency and traceability.
- Tech Stack:** Node.js, DynamoDB, AWS Lambda, TypeScript, JavaScript, Python, Docker.

WhatBytes

November 2024 - December 2024

Software Development Intern

Bengaluru, Karnataka

- Contributed to both **Frontend** and **Backend** teams, developing full-stack application for production use.
- Designed **relational database schemas** and developed **SQL queries** to ensure data integrity for client projects.
- Designed and implemented **RESTful APIs**, ensuring reliable performance for client applications.
- Tech Stack:** Express.js, Next.js, Node.js, PostgreSQL

PROJECTS

GreenStride | [Link](#) | *AI-Powered Carbon Footprint Tracking Web-App.*

October 2024

- Developed a web application for logging daily activities and tracking carbon footprint.
- Integrated **AI** to provide **personalized suggestions** for reducing environmental impact, Implemented dynamic **visualizations** and added a **leaderboard feature** that ranks users based on their monthly carbon footprint reduction, encouraging friendly competition.
- Deployed the application using **AWS EC2** for hosting the server and **AWS RDS** for managing relational data storage, ensuring reliable application performance.
- Tech Stack** - MongoDB, PostgreSQL, Express.js, React.js, Node.js, LLaMA3 model, JWT Token, AWS RDS, AWS EC2.

PsycheHealth | [Link](#) | *A Web App for Mental Health Risk Assessment.*

May 2023

- Developed and implemented machine learning components and back-end infrastructure using **Flask** framework and **SQLite3** database.
- Improved model **accuracy** from **66%** to **91%** through hyperparameter tuning and feature engineering, achieving an **F1-score** of **0.91**.
- Projected to positively impact over **280 million** people worldwide.
- Tech Stack** - Python, Flask, SQLite3, HTML, CSS, Pandas, Scikit-learn, Matplotlib, UNITY.

TECHNICAL SKILLS

Languages: C++, Python, JAVA, SQL (MySQL, Postgres), JavaScript, HTML/CSS

Frameworks & Developer Tools: React.js, Node.js, Flask, Express.js, Git, VS Code, Xcode

Concepts: Object-Oriented Programming (OOP), Data Structures Algorithms (DSA), Problem Solving

Cloud Platforms: AWS

ACHIEVEMENTS

- Advanced to the **Second** round of **Adobe GenSolve**, outperforming **3 lakh+ teams**.
- Advanced to the **final** round of PULZION'23 hackathon, outperforming **50+ teams**.
