EDUCATION

Pune Institute of Computer Technology

Bachelor of Engineering in Computer Engineering, **CGPA - 8.44/10**

Pune, India

December 2021 – June 2025

EXPERIENCE

Guidepoint

June 2025 – August 2025

Backend Development Intern

Pune, Maharashtra

- Built backend services in a serverless architecture using **Node.js**, **DynamoDB**, and **AWS Lambda**.
- Developed a reusable **TypeScript** utility package for structured logging, improving **log consistency** and **debugging workflow** across internal Node.js services.
- Created automation scripts in **Node.js** and **Python** for product-related backend operations, integrating with **DynamoDB** and **Auth0** APIs to improve internal efficiency and traceability.
- Tech Stack:** Node.js, DynamoDB, AWS Lambda, TypeScript, JavaScript, Python, Docker.

WhatBytes

November 2024 - December 2024

Software Development Intern

Bengaluru, Karnataka

- Contributed to both **Frontend** and **Backend** teams, developing full-stack application for production use.
- Designed **relational database schemas** and developed **SQL queries** to ensure data integrity for client projects.
- Designed and implemented **RESTful APIs**, ensuring reliable performance for client applications.
- Tech Stack:** Express.js, Next.js, Node.js, PostgreSQL

PROJECTS

GreenStride | [Link](#) | **AI-Powered Carbon Footprint Tracking Web-App.**

- Built a web application for users in **G20 countries** to log daily activities and calculate carbon emissions using **region-specific emission factors** and environmental data.
- Integrated **LLaMA3 model** to analyze user activity patterns and generate tailored suggestions for reducing carbon footprint based on regional sustainability options.
- Created a **blogging platform** where users can document carbon reduction efforts and share sustainability practices, providing a dedicated space for environmental content previously scattered across Reddit and other forums.
- Developed interactive **data visualizations** and a **leaderboard** that ranks users by monthly emissions reduction to encourage participation and behavior change.
- Deployed application on **AWS EC2** with **PostgreSQL** database on **AWS RDS**, implementing **JWT-based authentication** for secure user sessions.
- Tech Stack** - Node.js, MongoDB, PostgreSQL, Express.js, React.js, LLaMA3, JWT, AWS RDS, AWS EC2.

PsycheHealth | [Link](#) | **A Web App for Mental Health Risk Assessment.**

- Developed and implemented machine learning components and back-end infrastructure using **Flask** framework and **SQLite3** database.
- Improved model **accuracy** from **66%** to **91%** through hyperparameter tuning and feature engineering, achieving an **F1-score** of **0.91**.
- Built a **focus-training** game where players select non-blinking objects to improve **attention** span.
- Projected to positively impact over **280 million** (WHO data) people worldwide.
- Tech Stack** - Python, Flask, SQLite3, HTML, CSS, Pandas, Scikit-learn, Matplotlib, UNITY.

TECHNICAL SKILLS

Languages: C++, Python, JAVA, SQL (MySQL, Postgres), JavaScript, HTML/CSS

Frameworks & Developer Tools: React.js, Node.js, Flask, Express.js, Git, VS Code, Xcode, Postman

Cloud Platforms: AWS

ACHIEVEMENTS

- Advanced to the **Second** round of **Adobe GenSolve**, outperforming **3 lakh+ teams**.
- Advanced to the **final** round of PULZION'23 hackathon, outperforming **50+ teams**.
